Anniversary Celebration

# BELIEVING IN THE POTENTIAL OF ALL CHILDREN,

Horizons at Harley partners with students, families, and schools from the city of Rochester to cultivate academic success through summer learning, facilitate opportunities throughout the year, and inspire a lifelong joy in learning.

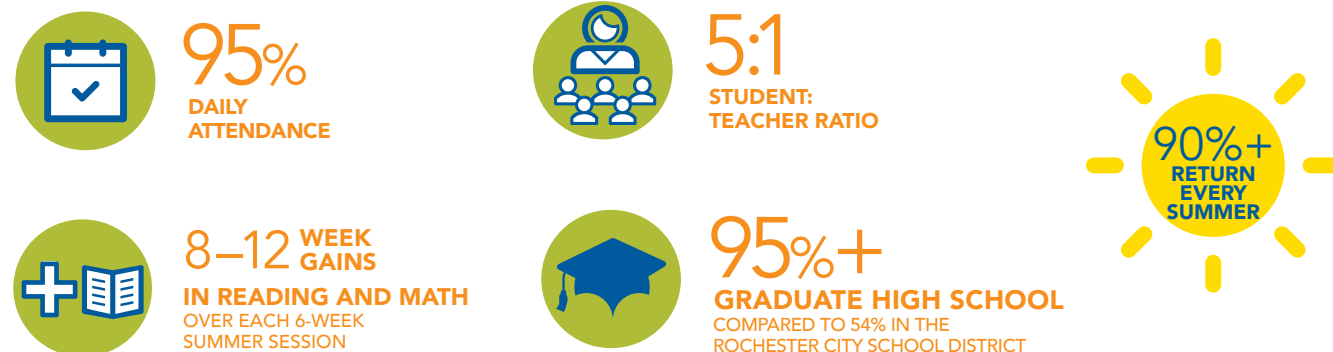

Founded in 1995, the Horizons Student Enrichment Program at The Harley School makes a nine-year commitment to 135 Kindergarten through 8<sup>th</sup> grade students from low-income families in the city of Rochester, and provides year-round support and mentorship for 30 students in high school. Horizons students spend six weeks each summer on the campus of The Harley School engaged in a full-day program that blends high-quality academics with cultural enrichment and typically make two to three-month gains in math and reading. The program is proven to close the opportunity gap through long-term, deep engagement with students and families. More than 95% of our 8<sup>th</sup> grade graduates have gone on to complete high school and more than 70% have gone on to higher education.

## Horizons transforms the way students see themselves and their future.

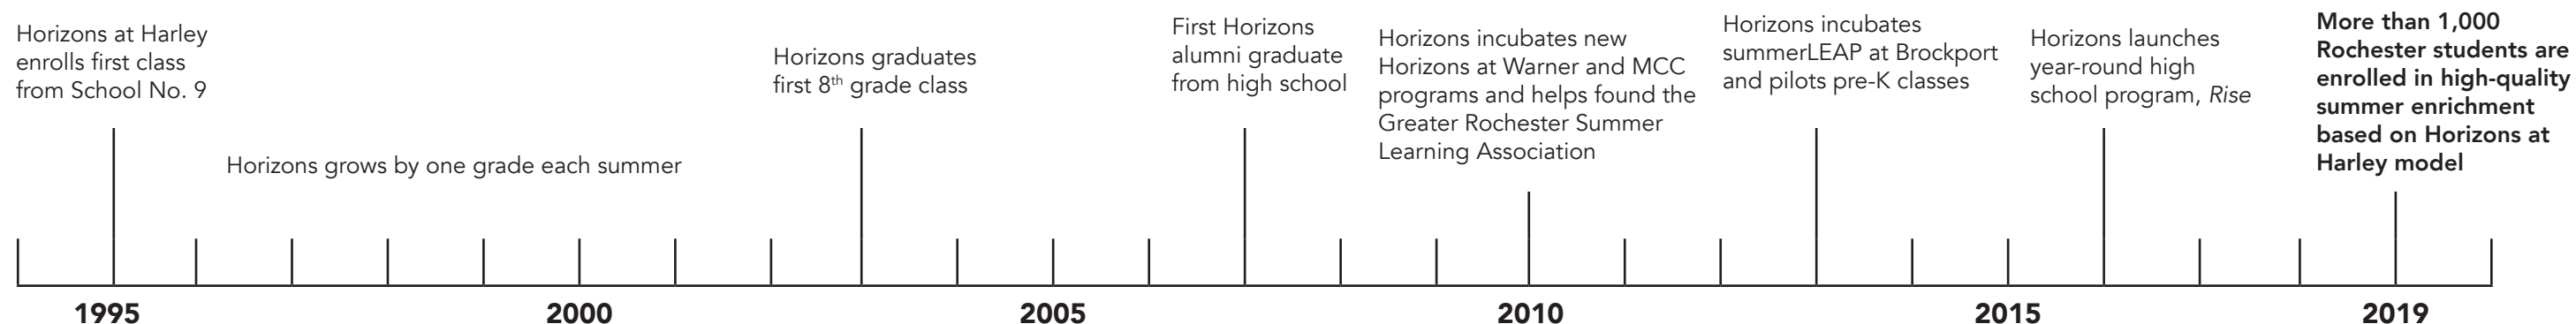

Horizons at Harley was one of the first affiliates of Horizons National, a network of almost 60 programs across the United States committed to offering a high-quality learning experience outside of the traditional school year. Here in Rochester, Horizons at Harley has incubated summer learning programs at University of Rochester's Warner School of Education, Monroe Community College, and SUNY Brockport, and helped found the Greater Rochester Summer Learning Association.

Today, more than 1,000 Rochester students are enrolled in high-quality summer enrichment based on the Horizons at Harley model.
